FOR IMMEDIATE RELEASE

## STATEMENT REGARDING FAA INVESTIGATION FINDINGS

**Nashville, TN** – Go Skydive Nashville acknowledges the Federal Aviation Administration’s completion and release of its investigation into the tragic skydiving incident that occurred on October 4, 2025, resulting in the loss of instructor Justin “Spidey” Fuller.

From the outset, Go Skydive Nashville has fully cooperated with the FAA and local authorities throughout the investigative process. The FAA’s report confirms that the aircraft involved was properly maintained, with no discrepancies noted in the aircraft or its maintenance records.

The findings describe a complex and rapidly evolving emergency during aircraft exit, during which the instructor and student became temporarily entangled on the aircraft step before separating. The student’s reserve parachute deployed successfully, and the student survived the incident. Tragically, instructor Justin Fuller lost his life.

Go Skydive Nashville has received the FAA’s report and is reviewing it carefully. We will evaluate the findings in full and, where appropriate, incorporate any improvements that further strengthen our training and operational practices.

“Our hearts remain with Justin’s family, friends, and everyone who knew him,” said Robbie Hill of Go Skydive Nashville. “This loss is deeply felt throughout our community. We remain committed to maintaining the highest standards of safety, training, and operational discipline.”

Go Skydive Nashville remains committed to transparency and cooperation with all appropriate authorities. Out of respect for those most affected, the company will not speculate beyond the information contained in official investigative findings.
